ABOUT ME

Have 4+ years of experience building conversational, chat bot, voice clone, teaching bots, quiz generators, course design systems, reservation, and audio/video content shorteners agents. Experienced with Model Evaluation, AI Security, AI Governance, PII, RAG pipelines, open and closed-source LLMs, Pydantic Ecosystem, LangChain Ecosystem, Hallucination Mitigation, AI Model Cost Optimization, Token Optimization, Model Deployment, Monitoring and Token Utilization Auditing, VLLMs, MCP, Fault Tolerant Architecture, RAGAS, AI Automation and speech technologies (TTS/STT). I follow clean coding practices and orchestration-based design patterns to build scalable AI workflows while collaborating with AI, backend, and DevOps teams.

SKILLS

Technical:

FastAPI, SQL, Ollama, Whatsapp / Telegram Integration, OPENAI API, Anthropic Model API, Google Model API, LangChain, LangGraph, LangSmith, Pydantic AI, Pydantic Fields, n8n, OpenClaw, NanobotAi, Hugging Face, QLoRA, TTS/STT, Git and Github. CI/CD, Linux, Celery, premises server, redis.

System Design: Monolith & Microservices Architecture, Orchestration Design Patterns, Class Diagrams.

Analytical: Data Pre-processing, Information Extraction, Data Visualization.

Business & Collaboration:

Business Analysis, Requirement Gathering, Stakeholder Management, Cross-functional Collaboration, Technical Documentation, Problem Solving.

WORKING EXPERIENCE

JR AI ENGINEER | Join Venture AI / On-site June 2025 – Present

- Consulted with clients to define AI solutions, selecting open/closed-source models based on scalability, infrastructure, and budget
- Designed end-to-end AI architectures, class diagram, workflows, and coding standards, improving maintainability and development efficiency
- Applied orchestration-based patterns to AI pipelines, accelerating development and simplifying debugging
- Coordinated 20+ engineers and collaborated across AI, backend, and DevOps teams to deliver scalable, production-ready systems

HEAD OF DOCUMENTATION / USG of Documentation Daffodil International University Model United Nations (DIU MUN) April 2022 – March 2025

- Led documentation operations for a national conference (~150 delegates), ensuring smooth coordination across 67 organizing members
 - Managed approvals, budget proposals, official communications, and end-to-end documentation processes
 - Collaborated with multiple departments (Finance, Transport, Hospitality, etc.) to deliver time-sensitive documents on schedule
 - Maintained strict documentation timelines, preventing operational delays and ensuring seamless event execution
 - Developed structured tracking and documentation systems, improving coordination and efficiency across parallel tasks
-

PROJECTS

AI Podcast Content Shortening System | Source code is confidential and not for public

Challenge: Compressing 50-minute podcasts to 30-40% length without losing narrative flow or using voice cloning.

Action: Resolved timestamp alignment issues and managed multi-speaker transitions to ensure sentence completeness.

Result: Successfully maintained 100% original audio integrity and narrative coherence in a significantly condensed format.

Community Emergency Response Automation | n8n | [Github Source Code](#)

Challenge: Route emergency reports from residents across three blocks to the correct authorities in real time

Action: Built an asynchronous system using n8n and Telegram Bot API (BotFather, setcommands, webhooks) with conditional logic; integrated GCP services (Drive, Sheets, Gmail)

Result: Delivered a scalable, low-latency pipeline with automated identity verification and incident dispatch, eliminating manual delays

AI Resume Analyzer & HR Automation System | FastApi | Opensource Model | [Github Source Code](#)

Challenge: High manual effort in filtering CVs and generating relevant interview questions for HR teams.

Action: Developed a FastAPI system using Pydantic for structured outputs and an orchestration-based design pattern for AI workflows.

Result: Automated candidate data extraction to Excel and generated match scores, reducing the HR workload significantly.

EDUCATION

M.S. IN SOFTWARE ENGINEERING - Daffodil International University | (2025–Present)

B.SC. IN SOFTWARE ENGINEERING -Daffodil International University | (2021–2025)

ACHIEVEMENTS

- **1st Runner-Up:** [3-Minute Thesis Competition](#) (Daffodil International University / University of Queensland) for "HR Helper: AI Solution for HR".
- **2nd Runner-Up:** [4th DIU Data Science Summit 2024](#) (National Project Showcase) for "AI ATS Resume Analyzer & Extractor".

Extra-Curricular Activities

Model United Nations:

- [NSTU Conference 2024](#): Represented Guyana in the Security Council.
- [Leading International University 2022](#): Represented Gambia in UNICEF.
- [Rajshahi University Conference 2020](#): Represented Jordan in the Specialized Committee for Bangladesh Affairs
