SUMMARY

Data & AI practitioner with 2–4 years of combined experience in data analytics, reporting automation, and AI-enabled workflow optimization across academic, project, and professional settings. Hands-on with SQL, Python (via IBM Data Science Professional Certificate), and data processing to build scalable, automated solutions that improve operational efficiency. Experienced in transforming unstructured data into structured, decision-ready outputs, collaborating with cross-functional teams, and documenting complex systems for business stakeholders.

CORE SKILLS

Analytics & Data Handling

- SQL (queries, joins, filters, aggregations)
- Data pre-processing & cleaning
- Data visualization & reporting
- Information extraction from unstructured text
- Automation of data pipelines and reports

Tools & Technologies

- Python (IBM Data Science coursework)
- FastAPI
- SQL-based storage and querying
- Excel / Google Sheets (tabular analysis, reporting)
- n8n (workflow automation)
- Git & GitHub
- Linux

AI & Systems

- OpenAI / Anthropic / Google model APIs
- LangChain, LangGraph, Pydantic AI, LangSmith
- TTS/STT, RAG pipelines, model evaluation
- Cost & token optimization
- Monolith & microservices architecture
- Orchestration-based design patterns

Business & Collaboration

- Business analysis & requirement gathering
 - Stakeholder management
 - Cross-functional collaboration
 - Technical documentation & communication
 - Problem solving & process improvement
-

PROFESSIONAL EXPERIENCE

JR AI Engineer

June 2025 – Present

Join Venture AI (On-site)

- Improved solution fit for client projects by systematically mapping business requirements to AI capabilities, by consulting with stakeholders to define data inputs, outputs, and success metrics.
- Increased system maintainability and development efficiency by standardizing end-to-end AI architectures, class diagrams, and workflow designs, by enforcing consistent coding and documentation practices across projects.
- Reduced debugging and iteration time on AI pipelines by applying orchestration-based design patterns, by modularizing data flows, model calls, and evaluation steps.
- Enhanced delivery capacity and cross-team alignment for production systems by coordinating 20+ engineers and collaborating across AI, backend, and DevOps teams, by establishing clear communication, interface contracts, and timelines.

Head of Documentation / USG of Documentation

April 2022 – March 2025

Daffodil International University Model United Nations (DIU MUN)

- Supported operational decision-making for a national conference (~150 delegates) by leading documentation operations, by organizing data (budgets, approvals, schedules) into structured, easily accessible formats.
 - Reduced approval cycle times by standardizing documentation templates for budgets, logistics, and official communications, by designing and enforcing consistent document workflows across 67 organizing members.
 - Improved cross-functional coordination between Finance, Transport, Hospitality, and other teams by implementing a structured tracking system, by monitoring document status and proactively resolving bottlenecks.
 - Minimized event delays and rework by maintaining strict documentation timelines and quality checks, by monitoring milestones and ensuring all required data was available to decision-makers on time.
 - Increased transparency and traceability of decisions by building organized archives of event data and documentation, by categorizing and indexing files for quick retrieval.
-

PROJECTS (DATA & ANALYTICS FOCUS)

AI Resume Analyzer & HR Automation System

FastAPI | SQL/Excel Output | Open-source Model | GitHub Source Code

- Reduced manual HR screening effort by automating candidate data extraction and scoring, as measured by the ability to bulk-process CVs and export structured results, by building an AI-powered resume analyzer with FastAPI and Pydantic-based schemas.

- Improved reporting and comparability across candidates by exporting parsed CV data and match scores into Excel/Sheets, by designing tabular outputs that HR could directly filter, sort, and analyze.
- Increased reliability of candidate evaluations by implementing structured evaluation workflows, by orchestrating multiple AI steps (parsing, scoring, question generation) with a clear pipeline design.

Community Emergency Response Automation

n8n | Telegram Bot API | GCP (Drive, Sheets, Gmail) | GitHub Source Code

- Eliminated manual routing delays for resident emergency reports across three blocks by automating incident intake and dispatch, by building an asynchronous workflow using n8n and Telegram Bot API with conditional logic.
- Enabled real-time operational visibility for authorities by integrating GCP Sheets as a live log of incidents, by automatically recording report details and status updates for tracking and analysis.
- Increased accuracy of incident handling by implementing automated identity verification and rule-based routing, by using structured data fields and validations within the workflow.

AI Podcast Content Shortening System

Audio Processing & Narrative Analytics | Source Code Confidential

- Compressed 50-minute podcast episodes to 30–40% of original length while maintaining narrative coherence, as measured by preservation of storyline and listener comprehension, by analyzing transcript structure and aligning timestamps for multi-speaker audio.
- Improved content usability for end users by converting long-form audio into concise, information-dense segments, by applying text segmentation, summarization, and audio clipping logic without altering original audio integrity.

EDUCATION

M.S. in Software Engineering

Daffodil International University

2025 – Present

B.Sc. in Software Engineering

Daffodil International University

2021 – 2025

CERTIFICATIONS & ACHIEVEMENTS

IBM Data Science Professional Certificate

Gained hands-on experience with Python for data science, data visualization, and basic machine learning workflows, including working with datasets, SQL, and analytical problem-solving.

Awards

- 1st Runner-Up, 3-Minute Thesis Competition (Daffodil International University / University of Queensland) for "*HR Helper: AI Solution for HR*" – recognized for data-driven automation of HR processes.
- 2nd Runner-Up, 4th DIU Data Science Summit 2024 (National Project Showcase) for "*AI ATS Resume Analyzer & Extractor*" – awarded for innovation in automating data extraction and analytics from resumes.

EXTRACURRICULAR

Model United Nations (Analytical & Communication Experience)

- NSTU Conference 2024: Represented Guyana in the Security Council.
- Leading International University 2022: Represented Gambia in UNICEF.
- Rajshahi University Conference 2020: Represented Jordan in the Specialized Committee for Bangladesh Affairs.
