

ANON HOSSAIN

Data Analytics & Automation Professional

Phone: +880 17410-97116 | Email: anonhossain1710@gmail.com

GitHub: github.com/anonhossain | Medium: medium.com/@anonhossain1710

PROFESSIONAL SUMMARY

Data and AI professional with 4+ years of experience designing data-driven solutions, automation workflows, and analytical systems. Skilled in SQL, Python, Google Sheets/Excel-based reporting, and data pre-processing. Proven track record of converting raw operational data into structured insights, automating manual reporting, and collaborating with cross-functional stakeholders to improve efficiency. Strong communication, documentation, and stakeholder management experience through leading large-scale, multi-team initiatives.

CORE SKILLS

Analytics & Reporting:

- Data Analytics, Business Reporting, KPI Tracking, Operational Performance Analysis
- Data Pre-processing, Information Extraction, Data Cleaning
- Data Visualization & Dashboarding (Google Sheets, basic charts and summaries)

Tools & Technologies:

- SQL
- Python (data analysis, automation scripts)
- FastAPI
- Google Sheets, GCP Sheets API, Excel (data tables, formulas, structured exports)
- Git, GitHub, Linux
- Telegram Bot API, Webhooks, n8n (workflow automation)

Systems & Design:

- Workflow Automation, Orchestration-Based Design Patterns
- Monolith & Microservices Architecture, Class Diagrams

Business & Collaboration:

- Business Analysis, Requirement Gathering
- Stakeholder Management & Cross-functional Collaboration
- Documentation, Process Design, Problem Solving, Communication

PROFESSIONAL EXPERIENCE

JR AI Engineer

June 2025 – Present

Join Venture AI | On-site

- Improved solution fit for client analytics and automation projects by consulting on business requirements and data constraints, by assessing scalability, infrastructure, and budget to select suitable open or closed-source models.
- Increased development efficiency and maintainability for internal analytics/AI tools by designing end-to-end architectures, class diagrams, and coding standards, by enforcing consistent design patterns across the team.

- Reduced debugging effort and improved reliability of data workflows by applying orchestration-based patterns to AI and automation pipelines, by modularizing components and clearly defining data flow and dependencies.
- Enhanced delivery speed and alignment on multi-team projects by coordinating 20+ engineers and collaborating across AI, backend, and DevOps teams, by setting clear interfaces, documentation, and delivery milestones.

Head of Documentation / USG of Documentation

April 2022 – March 2025

Daffodil International University Model United Nations (DIU MUN)

- Ensured error-free, on-time documentation for a national conference of ~150 delegates by leading documentation operations across 67 organizing members, by designing structured workflows and approval processes.
- Accelerated decision-making for finance and logistics by managing approvals, budget proposals, and official communications, by standardizing templates and centralizing document tracking.
- Improved cross-functional coordination between Finance, Transport, Hospitality, and other teams by designing documentation timelines and SLAs, by monitoring adherence and resolving bottlenecks.
- Reduced operational delays during events by maintaining strict documentation schedules and audit trails, by implementing simple tracking systems and checklists for parallel workstreams.
- Increased transparency and traceability of information across teams by developing structured tracking and documentation systems, by organizing data (delegates, schedules, budgets) into clearly indexed repositories.

PROJECTS (ANALYTICS & AUTOMATION FOCUS)

AI Resume Analyzer & HR Automation System

Tech: FastAPI, Python, Pydantic, Open-source LLM, Excel/Sheet Export

- Reduced manual CV screening effort for HR teams by automating candidate data extraction and scoring, by building a FastAPI-based system that parses resumes, structures data with Pydantic, and exports results to Excel/Sheets.
- Improved interview relevance and consistency by auto-generating tailored interview questions based on candidate profiles, by orchestrating LLM prompts in a reusable workflow.
- Enhanced reporting capability for HR stakeholders by generating match scores and structured outputs that can be filtered and aggregated in Excel/Sheets, by defining standardized fields and schema.

Community Emergency Response Automation

Tech: n8n, Telegram Bot API, Google Sheets, GCP (Drive, Sheets, Gmail)

- Eliminated manual routing delays for emergency reports across three residential blocks by automating incident intake and dispatch, by integrating Telegram Bot API with n8n workflows and webhooks.
- Improved data accuracy and traceability of incidents by logging structured reports (location, category, severity) into Google Sheets, by applying conditional logic and validation rules in the workflow.
- Accelerated communication between residents and authorities by integrating Gmail and Drive for automatic notifications and document storage, by configuring event-driven triggers and templates.

AI Podcast Content Shortening System

Tech: Python, Audio Processing, LLM-based Segmentation

- Preserved 100% original audio integrity while reducing 50-minute podcasts to 30–40% length, by resolving timestamp alignment and sentence boundary issues in multi-speaker audio.
- Improved listener experience and narrative coherence in shortened content by analyzing speaker turns and transitions, by designing a processing pipeline that respects semantic and structural continuity.

EDUCATION

M.S. in Software Engineering (Ongoing)
Daffodil International University

2025 – Present

B.Sc. in Software Engineering
Daffodil International University

2021 – 2025

CERTIFICATIONS

- **IBM Data Science Professional Certificate**
Curriculum includes Python, SQL, data visualization, and applied data science.

ACHIEVEMENTS

- 1st Runner-Up – 3-Minute Thesis Competition (Daffodil International University / University of Queensland) for **"HR Helper: AI Solution for HR"** (analytics and automation focus).
- 2nd Runner-Up – 4th DIU Data Science Summit 2024 (National Project Showcase) for **"AI ATS Resume Analyzer & Extractor"** (data extraction, scoring, and reporting).
