ABOUT ME

I have 4+ years of experience in data analytics, business analysis, and reporting. Skilled in data processing, SQL, Python, Excel, and Power BI for building dashboards, reports, and automation pipelines. Experienced in data extraction, manipulation, storage, visualization, and workflow optimization using SQL and non-SQL databases. Worked on business case development, strategic planning, forecasting, budgeting, revenue analysis, stakeholder management, and requirement gathering through client consultations. I also have experience in cross-team collaboration, task distribution, operational optimization, and delivering data-driven solutions for business growth.

SKILLS

Technical:

Python, Pandas, NumPy, Matplotlib, Seaborn, SQL, Excel, Power BI, DAX, VLOOKUP, Regular Expressions, Apache Airflow, GitHub Projects

Data & Analytics:

Data Pre-processing, Data Extraction, Data Manipulation, Data Visualization, Reporting Automation, Workflow Optimization, Traffic Analysis, Revenue Analysis, Forecasting, Risk Analysis

Business & System Design:

Business Analysis, Requirement Gathering, Functional Specifications, Business Case Development, Efficient Booking and Refund Workflow, Strategic Planning, Budgeting, Stakeholder Management, Market Analysis, Prepare BRD and FRD, Customer Experience Improvement, Churn Rate analysis, Integration of Excel, Python, SQL/Non-SQL Databases, GCP, Power BI

Soft Skills:

Client Consultation, Cross-team Collaboration, Technical Documentation, Project Planning, Communication, Problem Solving

WORKING EXPERIENCE

AI ENGINEER | Join Venture AI / On-site June 2025 – Present

- Consulted with clients to gather and clarify business requirements and analyze existing business systems to identify data-driven opportunities.
- Designed end-to-end solution architectures, workflows, and data models to support business analysis, reporting systems, and maintainable analytical pipelines, improving decision-making efficiency and system clarity.
- Applied orchestration-based patterns to AI pipelines, accelerating development and simplifying debugging
- Coordinated 20+ engineers and collaborated across AI, backend, and DevOps teams to deliver scalable, production-ready systems

BUSINESS ANALYST | AbSun Studio | Remote March 2022 - November 2024

- Conducted client discovery meetings to gather and analyze business requirements, translating them into Functional Requirement Specifications (FRS), ERDs, and Class Diagrams to establish a clear and validated project scope.
- Planned project timelines and recommended Agile or Waterfall development methodologies based on business requirements, improving project organization and execution.
- Managed stakeholder communication by identifying key stakeholders, categorizing their roles, and ensuring timely information sharing between clients, developers, and management teams.
- Performed risk assessments, monitored project progress, maintained schedules, and coordinated cross-functional teams to support successful project delivery throughout the Software Development Life Cycle (SDLC).

HEAD OF DOCUMENTATION / USG of Documentation Daffodil International University Model United Nations (DIU MUN) January 2023 – October 2023

- Led documentation operations for a national conference (~150 delegates), ensuring smooth coordination across 42 organizing members
 - Managed approvals, budget proposals, official communications, and end-to-end documentation processes
 - Collaborated with multiple departments (Finance, Transport, Hospitality, etc.) to deliver time-sensitive documents on schedule
 - Maintained strict documentation timelines, preventing operational delays and ensuring seamless event execution
 - Developed structured tracking and documentation systems, improving coordination and efficiency across parallel tasks
-

PROJECTS

Olympic Games Data Analysis & Visualization | Python, SQL, Power BI | [Github](#)

Challenge: Processed 271K+ Olympic records spanning 120+ years, handling significant missing values while preserving data integrity.

Action: Cleaned and preprocessed data in Python, used Iterative Imputer for missing values, merged datasets, loaded data into PostgreSQL, and built an interactive Power BI dashboard.

Result: Delivered an interactive dashboard with insights on medals, participation trends, and country performance while strengthening ETL, data cleaning, and BI visualization skills.

Diwali sales Analysis | [Github](#)

Challenge: Analyze 28K+ Diwali sales orders to identify key customer segments, regional performance differences, and product category contributions from large raw sales data.

Action: Used Python (Pandas, Matplotlib, Seaborn) for data cleaning, feature engineering, and visualization, then built an interactive Power BI dashboard showing revenue by zone/state, age group, gender, occupation, and product category.

Result: Identified the Central zone as the highest revenue contributor (42M), the 26–35 age group and female customers as the strongest customer segments, and Agriculture as the top product category, providing actionable insights for targeted sales growth.

EDUCATION

M.S. IN SOFTWARE ENGINEERING - Daffodil International University | (2025–Present)

B.SC. IN SOFTWARE ENGINEERING - Daffodil International University | (2021–2025)

ACHIEVEMENTS

- **1st Runner-Up:** [3-Minute Thesis Competition](#) (Daffodil International University / University of Queensland) for "HR Helper: AI Solution for HR".
- **2nd Runner-Up:** [4th DIU Data Science Summit 2024](#) (National Project Showcase) for "AI ATS Resume Analyzer & Extractor".

Extra-Curricular Activities

Model United Nations:

- [NSTU Conference 2024](#): Represented Guyana in the Security Council.
- [Leading International University 2022](#): Represented Gambia in UNICEF.
- [Rajshahi University Conference 2020](#): Represented Jordan in the Specialized Committee for Bangladesh Affairs
